

T-CAM TECHNOLOGY

REVOLUTIONARY LATCH MECHANISM

T-Cam is truly impressive for how much we've packed into such a small space - the low profile mechanism sits almost completely within the 10mm (3/8") slimline dish so there's practically no exposed area. This recessed design delivers unrivalled durability and protection from everything from impacts and friction against walls or other cases to destructive exposure from harsh conditions.

T-Cam offers an extraordinarily robust manufacture, made only from high quality steel with our signature PennBrite™ finish to create a hard-wearing and attractive model. The integral components are UK-designed with years of experience behind each piece we make so the action is guaranteed to work perfectly from the first time it's fitted.
