

# Penn Parcel Boxes

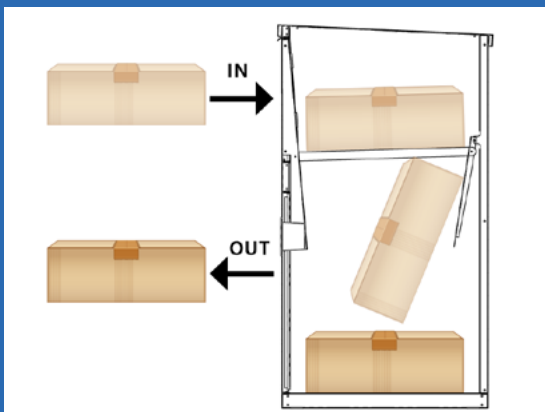

## PBX1 & PBX2

The secure solution to  
unattended parcel delivery

Penn Elcom's shopping cabinets are the ideal choice for a totally secure way to receive letters, parcels and boxes while unattended.

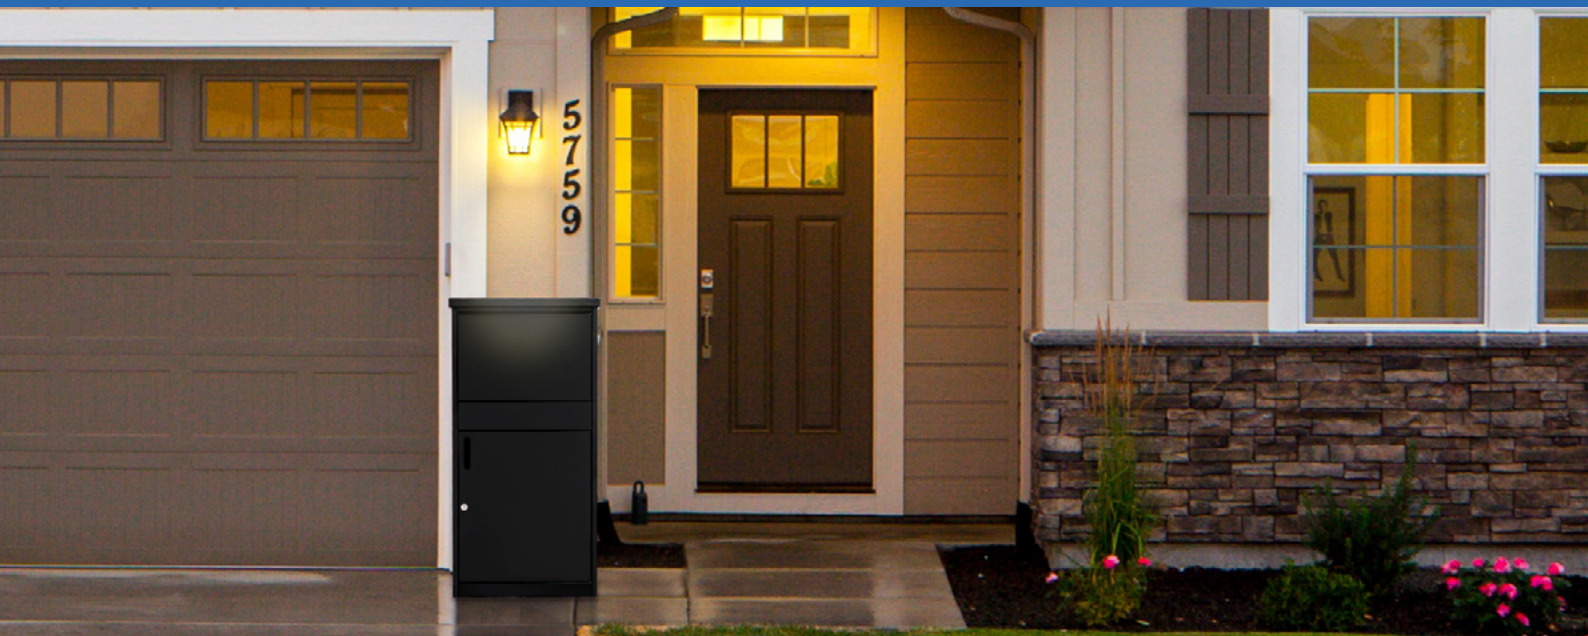

The weather resistant containers come pre-assembled and install anywhere quickly and easily, either by simply bolting to a concrete surface or by using interior weights. This makes PBX perfect for residences, offices, public areas or communal interiors.

## HOW IT WORKS

Deliveries are placed through a swing-open hatch at the top of the box into a loading bay. Then, when the handle is released the cantilevered bay floor swings down, allowing items to move securely into locked storage below.

This system ensures that items cannot be accessed from the entry hatch and offers the peace of mind security that deliveries are safe.

## CONTACT FREE

Since the PBX can be securely installed to porches, paths, gardens and driveways, it's ideal for home deliveries when occupants are unable to attend in person. Couriers simply drop the item into the box where it's safe until collection.

## ANTI THEFT

The clever two-stage security system ensures items cannot be reached through the entry hatch and remain inaccessible without the key.

## WEATHER RESISTANT

The PBX shopping cabinet is tough - with a strong anti-weather powder coat to keep it protected from the elements. Not only that, but the seals are also crafted with weather resistant materials so it's built to endure.

## TWO SIZES

PBX1 is the ideal model for homes and offices, perfect for everyday deliveries. For frequent parcel traffic and multiple users, the heavy duty PBX2 model has a larger volume and makes an excellent upgrade.

## MODEL SPECIFICATIONS

### PBX1

**Width:**

516mm / 20.31"

**Height:**

1025mm / 40.34"

**Depth:**

446mm / 17.55"

**Weight:**

34kg / 75lbs

PBX1 Maximum Box Size:  
420 x 240 x 360mm

### PBX2

**Width:**

723mm / 28.46"

**Height:**

1304mm / 51.34"

**Depth:**

732mm / 28.82"

**Weight:**

72kg / 158.7lbs

PBX2 Maximum Box Size:  
600 x 300 x 550mm
