

Home Delivery Box

SPB Series

PRE-ASSEMBLED

CONTACT-FREE

SAFE & SECURE

COST-EFFICIENT

These secure steel delivery boxes come pre-assembled, making a cost-efficient and contact-free postbox solution.

With three different sizes to accommodate larger items like bags and boxes plus a secure lockable construction, they're perfect for receiving grocery or parcel deliveries at home without the need to be present.

Each comes with two separate key-lock doors, designed to provide a safe and contact-free method for absent receipt of post. When a delivery is made, couriers can lock the drop door and place the keys through the space provided. The contents are then safe until collected later.

Two colour choices and three sizes cater for various requirements with a small, medium and large option available. Larger sizes include interior shelves for optimum separation and stacking of letters and parcels.
